About Me

My name is Edwin Chung and I am studying Computer Programming and Analysis in George Brown College. I am here today submitting my Resume hoping to speak with professional back-end developers.
I created my own portfolio website, along with many other websites and programs created through school projects or by myself. I'm a hard-working, problem solving and critical thinker who loves facing new challenges. I am looking for a job that will put my programming skills to work.
If you saw my resume, please contact me for more information.
